# SCUBA DIVING

Come enjoy the dive and the amazing sea life we have in Huatulco !!

In just 5 to 25 minutes from Santa Cruz Marina you will be diving in one of the many amazing dive sites the Huatulco National Park has to offer.

Being on the pacific side of Mexcio the topography is mostly rock formations with some hard and soft corals. Some of our dive sites have long extensions of coral plates in the first 40ft/12 m of water. All these formations are home to marine life like: moray eels, lobsters, octopus, many different kinds of rays, sea turtles and spotted eagle rays.

If you get very lucky from May - November you might get to see occasional giant manta or whale shark.

Diving Tours for CERTIFIED & NON CERTIFIED Divers available!!
